A Population-Level Shift In Cognition + Behavior | 'Billions' of Covid-Vaccinated Have 'Altered Brains' | Diminished Clarity, Reduced Willpower, + A Blunting Of Natural Intellect

Renowned Immunologist Sounds Alarm

SlayNews.com | Frank Bergman

World-renowned immunologist Dr. Sucharit Bhakdi is sounding the alarm to warn the public that Covid mRNA “vaccines” have unleashed a worldwide wave of systemic vasculitis that has “altered” the brains of “billions of people” who received the injections.

Systemic vasculitis is a multi-organ inflammation of the blood vessel lining.

Dr. Bhakdi warns that mRNA shots have triggered this deadly condition to surge among the Covid-vaxxed, and it is now damaging brains, hearts, and other organs on a mass scale.

Bhakdi contends the shots trigger immune activation centered on the endothelium across the brain, heart, liver, and beyond.

The endothelium is the thin cell layer lining blood vessels.

Bhakdi warns that vascular injury destroys neurons and produces a silent, widespread neurological decline.

He further claims the result is a population-level shift in cognition and behavior: diminished clarity, reduced willpower, and a blunting of natural intellect that leaves people less able to push back against medical coercion and overreach.

Bhakdi raised the alarm during a video interview, warning that the problem is so severe that there are “billions of people” whose brains have been “destroyed” by the Covid shots.

The award-winning former professor of microbiology argues that people have been permanently “altered” by the experimental injections.

> “The **mRNA vaccines cause** the **destruction of brain cells**,” Dr. Bhakdi warns.
>
> “Obviously. And that is what we are now experiencing.

> “We’re seeing – I’m afraid to say – **billions of people** whose **brains are not working** anymore.
>
> “Not as they should be.
>
> “They are **altered**,” he continues.
>
> “And they don’t have the willpower anymore.
>
> “They don’t have the intelligence anymore…”

Renowned Immunologist Sounds Alarm: 'Billions' of Covid-Vaxxed Now Have 'Alter…

Bhakdi's research points to several proposed pathways:

- Complement activation on endothelial surfaces (including anti-spike or anti-PEG pathways)
- Antibody-dependent cellular cytotoxicity against cells presenting spike peptides
- Direct LNP-driven innate immune signaling and endothelial stress
- Microthrombi formation and glycocalyx injury across the microvasculature

He argues these mechanisms, acting together, can explain real-world signals seen after "vaccination."

The outcomes are manifesting in the real world as surging reports of cardiac inflammation, neurologic events, microclotting, and sudden deaths.

Several red flags have been escalating among those who received the mRNA injections, including:

- **Persistence signals:** reports of spike fragments or vaccine mRNA detected in blood or tissues weeks to months later.

- **Platform effects:** animal work suggesting lipid nanoparticles can provoke inflammation even without the spike payload—raising questions about what's due to LNPs versus the encoded antigen.

- **Underestimation risk:** he says human evidence of serious adverse events is piling up, and poor separation of post-infection vs. post-vaccination effects has masked true risk.

This is not the first time Bhakdi has raised the alarm about the genetic shots, however.

As Slay News reported last year, Bhakdi testified that Covid mRNA shots are "life-threatening" to humans.

He warned that pushing the injections onto the public only benefits "infinitely evil" global "elites."

Dr. Bhakdi issued the warning during testimony before lawmakers in the German Parliament.

> "The vaccination turned out to be the greatest blessing for the money and world's elites, for the pharmaceutical industry and politics," Bhakdi declared.
>
> "They could pursue their own interests, under the common slogan 'Everything for public health,' 'everything for the well-being of the general public.'

> “To achieve this goal, they created the WHO [World Health Organization].
>
> “These non-democratically elected people, basically a private association that is in the process of gaining power over the healthcare system in the 190 Member States.”
>
> “Who hasn’t heard about the mysterious sudden cardiac deathsoccurring around the world?” he continued.
>
> “They are just the tip of the iceberg,” he warned.
>
> “Heart disease caused by vaccinations is on the agenda of young and old alike.

Concluding his testimony before German lawmakers, Bhakdi declared:

> “Anyone who praises RNA vaccines as safe and effective, anyone who claims that vaccination rarely causes serious side effects is either incredibly ignorant or **infinitely evil** – they are committing a crime.
>
> “Just like everyone who actively or passively pursues and supports this vaccination.
>
> “Because it is now scientifically proven that vaccination can only have negative effects, and this to a **life-threatening** extent.”

Bhakdi characterizes this as a crime against humanity.

He is loudly calling for an immediate halt to mRNA programs before, in his view, the damage becomes irreversible.

However, Bhakdi and other leading experts fear it’s already too late for most.
